

Niral Patel | Java Developer

+1 705-577-3232 | patelniral065@gmail.com | LinkedIn: www.linkedin.com/in/niral-patel32

Professional Summary

- **Results-driven** Full Stack Java Developer with **3+ years of experience in designing, developing, and deploying scalable enterprise applications** using Java, Spring Boot, Hibernate, and Microservices architecture.
- **Strong foundation in** Core Java, Object-Oriented Programming (OOP), Multithreading, Collections, and Exception Handling **for building high-performance backend systems.**
- **Experienced in developing and consuming** RESTful APIs and Web Services, **enabling seamless integration between backend services and front-end applications.**
- **Proficient in** Spring Framework components including Spring Boot, Spring MVC, Spring Security, and Spring Data JPA **for building secure and scalable applications.**
- **Hands-on experience with** Microservices architecture, API development, and distributed systems, **improving application scalability and maintainability.**
- **Experience working with** relational databases including MySQL and Oracle, **focusing on** database design, query optimization, and performance tuning.
- **Familiar with** cloud platforms such as AWS and Microsoft Azure, **deploying and managing cloud-native applications and scalable infrastructure.**
- **Proficient with** version control and DevOps tools including Git, Jenkins, and CI/CD pipelines, **ensuring efficient development and deployment workflows.**
- **Experienced working in** Agile/Scrum environments, **participating in sprint planning, code reviews, application support, debugging, and delivering high-quality software solutions within deadlines.**
- **Skilled in** front-end development using HTML5, CSS3, JavaScript, and modern frameworks such as React and Angular **to build responsive user interfaces.**

Skills

- | | |
|--|---|
| <ul style="list-style-type: none">• Programming Languages: Core Java 8,11,17,21 JavaScript, TypeScript.• Backend Technologies: Java, Spring Boot, Spring MVC, Spring core, JDBC, JPA, Hibernate, RESTful APIs, Spring Framework, Apache Kafka.• DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3, Lambda), Jenkins, GitHub Actions, Docker Hub, CI/CD Pipelines | <ul style="list-style-type: none">• Testing: JUnit, Mockito, Selenium.• Swagger, OpenShift, Data Structures & Algorithms.• Database Management: MySQL, SQL, PostgreSQL, MongoDB, Oracle• Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), ReactJS, Angular, Bootstrap• Development Tools: Git, GitHub, Postman, JIRA, Eclipse, VS Code, Log4J, Maven, Gradle. |

Professional Experience

Full stack Java Developer - South medic Incorporated

- Designed, developed, and deployed scalable enterprise applications using Java, Spring Boot, and Microservices architecture, integrating RESTful APIs and relational databases based on detailed design specifications.
- Collaborated in an Agile/Scrum development environment, working with cross-functional teams including developers, QA, and product owners to deliver high-quality software solutions.
- Developed and implemented responsive front-end components using React.js, HTML5, CSS3, and JavaScript, improving user experience and optimizing page load performance.

- Built and maintained RESTful APIs and backend services, enabling seamless communication between front-end interfaces and backend systems.
- Utilized Hibernate and JPA for Object Relational Mapping (ORM) and optimized SQL queries to improve database performance and application efficiency.
- Implemented secure authentication and authorization mechanisms using JWT and OAuth 2.0, ensuring secure access to APIs and application services.
- Deployed and managed applications on AWS cloud infrastructure, leveraging services such as EC2, S3, and RDS for scalable and reliable application hosting.
- Automated build, testing, and deployment processes by implementing CI/CD pipelines using Jenkins, Git, and Docker, improving release efficiency and code quality.
- Improved overall application performance and scalability by optimizing backend business logic, database queries, and service communication.
- Participated in end-to-end software development lifecycle (SDLC) including requirement analysis, design, development, testing, deployment, and production support.
- Integrated Java-based applications with cloud AI/ML services such as AWS SageMaker, supporting AI-driven solutions for model training, deployment, and data processing.

Software Developer - In N Out

- Designed and built backend web services using **Spring Boot, Hibernate, and MySQL**.
- Participated in client requirement gathering and Object-Oriented Analysis and Design Patterns.
- Developed dynamic web applications with **JavaScript, Angular, and Bootstrap** for a seamless user experience.
- Wrote unit tests with **JUnit & Mockito**, improving code reliability by **95%**.
- Managed application deployment using **Docker** reducing deployment time by **40%**.
- Implemented application security using Spring Security framework
- Resolved technical issues through collaboration, improving overall development efficiency.

Software Developer Intern - Venom Technologies

- Collaborated with the team in Agile/SCRUM environment to deliver tasks within project deadlines.
- Contributed in designing, developing, and testing **Java applications** under the guidance of senior developers.
- Applied hands-on experience in **object-oriented programming concepts, data structures, and core Java**.
- Used and applied **version control tools** such as **Git/GitHub** for collaborative development.
- Assisted senior developers in deploying applications on **cloud or local servers**.

Education

- Mobile Solution Development, Conestoga College, Canada | 2025
- Computer Engineering, Sardar Patel College of Engineering, India | 2023
